

SIDHARTH KUMAR

• Full-Stack Developer • App Development • Custom Software Development

Kanpur, India | +91 8546012110 | sskumar20sign@gmail.com | linkedin.com/in/sidharth-kumar-059269294 | github.com/SSKumar-21

SUMMARY

Full-stack and app developer with hands-on, production experience shipping end-to-end web and mobile features using Node.js, Express.js, Flutter, JavaScript, REST APIs, and relational/NoSQL databases (PostgreSQL, MySQL, MongoDB, Firebase). Comfortable owning a build from architecture to deployment — has built and deployed custom APIs, real-time multiplayer systems, and AI-integrated applications. Solved 700+ DSA problems and leads technical initiatives as Chief Programmer of a college coding society.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Dart, C

Full-Stack / Web: Node.js, Express.js, React.js, REST API design & integration, HTML, CSS, EJS

App Development: Flutter, Android Studio, Firebase Authentication, Firebase, Realtime Database

Databases: PostgreSQL, MySQL, MongoDB, Firebase Realtime Database

Cloud & Tools: Git, GitHub, Render, Firebase Hosting, Postman

AI / Applied: AI Agents, Generative AI, OpenCV, Computer Vision (MediaPipe)

CS Foundations: Data Structures & Algorithms, OOP, DBMS, Operating Systems

EXPERIENCE

Web Developer | Booksopedia (Freelance) Jan 2025 – Apr 2025

Remote

- Built and shipped full-stack bookstore features end to end using JavaScript, Node.js, EJS, and Express.js, from schema design through deployment.
- Designed and integrated REST APIs to connect frontend and backend services, focusing on clean structure and responsive UX.
- Deployed and monitored production services on Render, improving uptime and load performance by an estimated 20%.
- Debugged and resolved cross-stack performance issues, strengthening real-world full-stack development practices.

Android Development Intern | Google for Developers Jul 2024 – Sep 2024

Remote

- Built native Android applications with modern UI design and third-party/REST API integrations.
- Applied Android architecture, debugging, and testing best practices across 5+ hands-on projects.
- Completed the structured Google for Developers Android Development Program (10-week virtual internship).

Virtual Intern | ServiceNow × AICTE × SmartBridge May 2026 – Jun 2026

Remote

- Completed structured training in ServiceNow Administration, Flow Designer, Reporting, and Agentic AI.
- Built workflow automation solutions and gained hands-on exposure to enterprise platform fundamentals.

PROJECTS

SpeakSync — AI Communication Trainer — JavaScript, Node.js, REST APIs

- Built a full-stack speech-analytics platform with live recording, real-time transcription, and AI-generated feedback (WPM, filler words, scoring).
- Implemented progress tracking with streaks and session history, backed by a custom REST API.

Knife N Gun — Real-Time Multiplayer Mobile Game — Flutter, Firebase Realtime Database

- Built a social-deduction multiplayer app synchronised live across devices via Firebase, with no dedicated game server.
- Implemented lobby management, role assignment, distributed voting, and an automatic win-condition engine using a state-driven architecture.

Student Management API — Node.js, Express.js, PostgreSQL, MySQL, MongoDB

- Designed a RESTful API with full CRUD functionality for student records, including structured schema design and multi-database integration.

Geeta Kanha — AI Guidance App — Flutter, Express.js, REST APIs

- Shipped and deployed a full-stack, privacy-first AI chatbot app (live at bhagwat-geeta-d4ma.onrender.com) with stateless, on-demand request handling.

Train Traffic Control System — Web Dashboard, Real-time Data Handling

- Built a centralised dashboard app to organise train, station, route, and scheduling data as a foundation for real-time operational monitoring.

FoodAPI — *Node.js, REST APIs*

- Developed an API-driven recipe application with asynchronous data handling and dynamic content rendering.

EDUCATION

Bachelor of Technology, Computer Science & Engineering *Expected 2027*

Axis Institute of Technology and Management (AKTU, Lucknow) — CGPA: 8.8/10

Senior Secondary (Class XII), CBSE 2022

Air Force Bal Bharati School, Delhi — 76%

Secondary (Class X), CBSE 2020

Air Force Bal Bharati School, Delhi — 86%

CERTIFICATIONS

- Web Development — Solo-learn (Jan 2025)
- Introduction to Python — Solo-learn (Feb 2025)
- SQL (Basic) — HackerRank
- Data Analytics with Python — FreeCodeCamp
- Business Analytics with Excel — Microsoft (Aug 2026)
- ServiceNow Virtual Internship Program — AICTE × SmartBridge × ServiceNow (2026)
- Deloitte Data Analytics Job Simulation — Forage (2026)
- Deloitte Cyber Security Job Simulation — Forage (2026)
- Google for Developers — Android Development Program (2024)

POSITIONS OF RESPONSIBILITY

- Cyber Security and Innovation Head, E-Cell, Axis Colleges — Leads the Cyber Innovation division; runs workshops on networking, Linux, and web security (2026–Present).
- Chief Programmer, Sanganak Shila Society, Axis Colleges — Supports and Guides teams in project development, competitive and collaborative coding. (2025–2026)
- Chief Programmer, Binary Brain Tech Club — Guides teams in project development, debugging, and collaborative coding practice (2024–2025).
- Class Representative, AITM — Liaison between faculty and students on academic matters (2023–Present).

ACHIEVEMENTS

- Coding Catalyst 2025 — 1st Rank (Coding Champion).
- Solved 700+ DSA problems across LeetCode.
